

1 December 2017

Revised guidelines for panel banks' Nibor submissions

Amendments have been made to the guidelines for panelbanks' Nibor submissions. The guidelines enter into force on 1 December 2017.

The amendments do not change the panel banks' determination of Nibor contributions but will make it more transparent how foreign currencies other than US dollars are used in determining Nibor submissions, and that a spread is added to the swapped borrowing rate to reflect an interest rate that the bank would charge for lending.
