

Date: 13 October 2022

NoRe launches new website 17 Oct 2022

New website and email address for NoRe

Effective on the 17th October 2022, NoRe's website will change to a new URL <https://www.nore-benchmarks.com>. The new email to NoRe is post@nore-benchmarks.com. Inquiries regarding licensing can still be directed to subscriptions-no@globalrateset.com. The old URL and email addresses will be forwarded to the new ones.

New logo, design and navigation on the website

NoRe has developed a new logo, which should be easily recognized and symbolize the activity as the administrator of Nibor. With the aim of making relevant content easily available to all users, NoRe has adjusted the design and navigation of the new website. All content from the old website is still available, and some new fast-track buttons have been established.

Access to news, transparency statements and consultations is improved. Furthermore, it should be easier to find how and where to complain or access whistleblowing procedures.

Information about subscriptions, vendors and information on fees have been simplified. Delayed data and monthly statistics can still be accessed free of charge but requires an account.

Access to Nibor through delayed data and subscriptions

At the new website, delayed Nibor rates and monthly statistics will be available to registered users only. Registration is available on the new website. Delayed Nibor data and monthly statistics are aimed at non-professional users who need access to delayed Nibor benchmark rates for analytical and non-commercial use.

Professional users and commercial businesses are catered for via authorized vendors. Redistribution or commercial exploitation of the Nibor data is prohibited. In the case that live rates (up to 24 hours delayed) are required, or if you are a vendor who wishes to redistribute live or delayed data to third parties, please sign up for a subscription, or contact subscriptions-no@globalrateset.com.

For any questions, please contact post@nore-benchmarks.com
