Nibor - Subscription fees 2024 - Unchanged

Subscription fees for access to Nibor will remain unchanged for 2024.

NoRe has decided that subscription fees for 2024 shall be equal to the fees applicable for 2023. Subscription fees were increased going into 2023, mainly due to costs applied to Nibor having been recognized as a critical benchmark ref. the EU Benchmarks Regulation. For 2024, NoRe does not see any need to increase prices.

Please find the most recent versions of the subscription fees and of the NoRe Terms and Conditions published on the website <https://nore-benchmarks.com/subscribe/subscription-charges/>
